What Do Your Results Mean?

1. If your highest score was A, your primary channel is: Paid Ads (PPC)

You're a fast tracker, and you need leads now. For you, budget isn't a problem. You're ready to invest for immediate data and results because you understand that paying for targeted traffic is the quickest way to get in front of customers ready to buy.

Your next steps: Set your budget, define your target audience, and create a compelling offer.

2. If your highest score was B, your primary channel is: SEO (Search Engine Optimisation).

You're fully locked in. The long game doesn't scare you because you're laser-focused on building a sustainable, long-term strategy. Your mission is to attract customers who are actively searching for your solutions.

Your next steps: Set up your Google Profile, do foundational keyword research, and optimise your homepage.

3. If your highest score was C, your primary channel is: Social Media.

You love a good and vibrant community. You understand the power of authentic connection. You know that a loyal tribe of followers can change the game entirely. For you, marketing is about building trust and creating a brand people are excited to be part of.

5. If your highest score was E, your primary channel is: Content Marketing.

You're an educator. Your strength lies in creating value and building trust through expertise. You believe that by generously teaching and helping your audience, you'll naturally attract the best customers.

Start Building Your Marketing Strategy

Your quiz result gives you the perfect channel to prioritise, but it shouldn't be the only channel you ever use. Your other scores matter, too.

The most successful brands use a smart mix of marketing to connect with their audience. For example, a customer might discover your business on Instagram, visit your website to learn more, and then join your email list for a special offer. Each channel plays a specific role, but they all need a central base to be effective.

Regardless of your #1 answer, every business needs a solid website – this is where all your marketing efforts point back to. Don't worry, it doesn't need to be a massive 30-page site; a simple one-page microsite is often enough to establish your credibility.

Well, now you know what you need to do! It's your turn to start building those strategies. Need help breaking it down? Partner with our team at Move Ahead Media today!
